## Savage AC338 AccuCan Suppressor

### The Case for the Savage Arms AC338 ACCUCAN Suppressor

In the world of shooting and hunting, the pursuit of perfect equipment is endless. Yet, every so often, a product comes into the market that stands a cut above the rest. Enter the Savage Arms AC338 ACCUCAN Suppressor, an innovative marvel in the world of suppressors. Let's dive into what makes this suppressor a game-changer and why every firearms dealer should be introducing it to their discerning customers.

#### Lightweight Design - The Perfect Field Companion

Weighing in at a mere 18.5 oz, the AC338 is one of the lightest suppressors available today. This lightweight feature ensures minimal addition to your firearm's weight, making it comfortable to carry all day during hunting expeditions or long-range shooting activities. Gone are the days of the hefty suppressors that become a liability during extended field sessions.

#### The Brilliance of MonoKore Design

One of the standout features of the AC338 is its state-of-the-art MonoKore design. This innovative approach results in a suppressor that not only reduces the sound but also minimizes other disturbances like flash and recoil. With the MonoKore design, shooters experience increased accuracy, a boon for both the seasoned and novice shooter.

#### Field Serviceability – A Dream for the DIY Enthusiast

What's better than a high-quality suppressor? One that is fully serviceable in the field. The AC338 has been ingeniously designed in three pieces, ensuring that servicing it is straightforward. Whether you're in the middle of a hunt or on the range, any necessary adjustments can be done swiftly without the need for specialized tools or equipment.

AC338

### **Hearing Safe and Environmentally Friendly**

The AC338's capacity to drop the sound to levels well below the hearing-safe threshold is not just a luxury—it's a necessity. The average measurement stands at a staggering 132.5dB on an 26" bolt action rifle. This ensures that the shooter's hearing is safeguarded, reducing the risks associated with repeated exposure to loud noises.

Moreover, using suppressors in hunting is increasingly being recognized as environmentally friendly. The reduced noise ensures minimal disturbance to the wildlife, reducing the chances of spooking or scaring away the game, allowing for a more ethical hunting experience.

### **Unparalleled Design Strength**

The AC338 doesn't just stop at being lightweight. It boasts an unmatched strength-to-weight ratio, a testament to Savage Arms' commitment to excellence. This suppressor has been built with military-grade materials, ensuring durability without compromising on the weight.

### **The Details Matter**

From a suppressor core with integrated carbon cutters to its limited rate of fire and the 5/8-24 direct thread mount it ships with, every feature of the AC338 is purpose-driven. It's compatible 338LM, adding 10.9" to the muzzle and ensuring that it seamlessly integrates with a host of firearms.

### **Conclusion**

The Savage Arms AC338 ACCUCAN Suppressor is not just another addition to the market—it's a testament to innovation, commitment, and the pursuit of perfection. For firearm dealers, this is more than a product; it's an experience you're offering to your customers. Equip them with the best, and they'll not only thank you for it but will also become loyal patrons, coming back for more. The AC338 isn't just a suppressor; it's a revolution. Embrace it.
